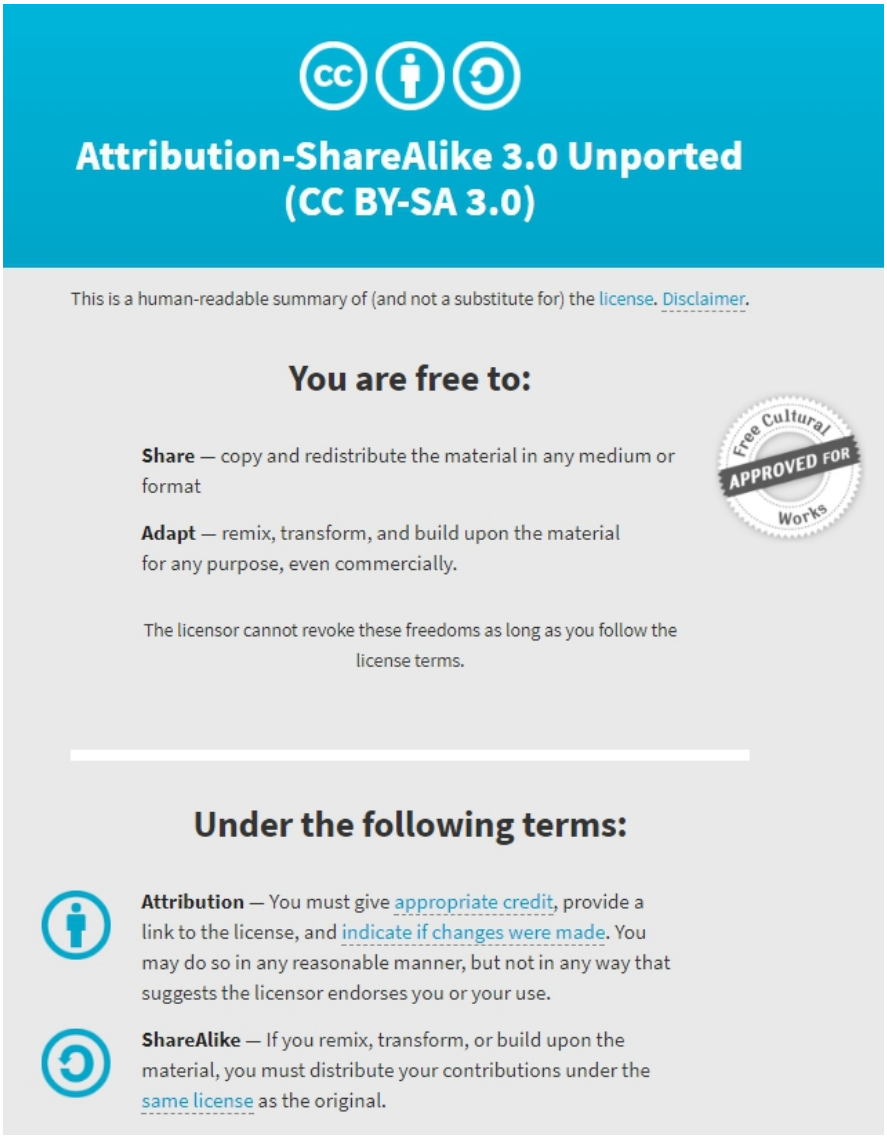
BLISS SYMBOL

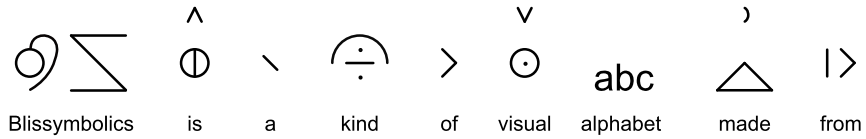
DICTIONARY



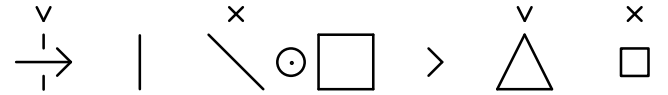
BCI

The content in the Blissymbol Dictionary has been produced over many decades by Blissymbolics Communication International. Please donate to BCI to support their amazing work developing the Bliss Lexicon and software:

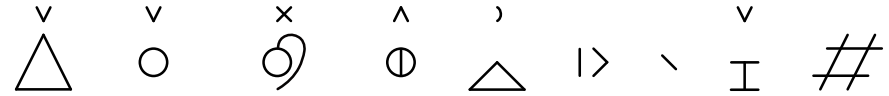
http://www.blissymbolics.org/index.php/licensing



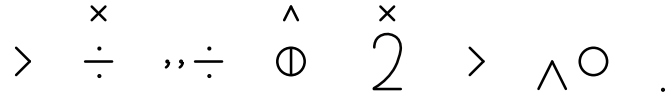
Blissymbolics is a kind of visual alphabet made from



simple line drawings of natural things .

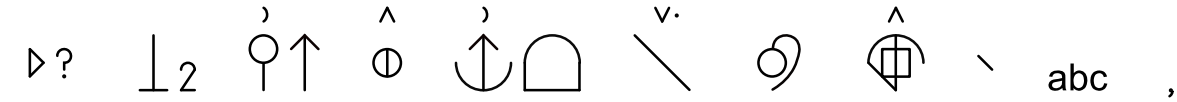


natural spoken languages are made from a small number

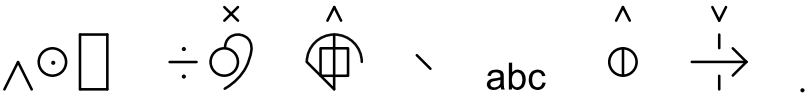


of parts which are sounds of speech .

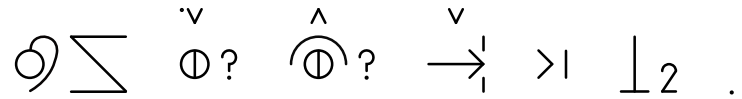
these sounds of speech are represented by the letters of alphabets .



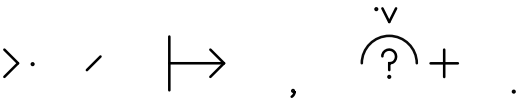
because you grew up being taught written language using an alphabet ,



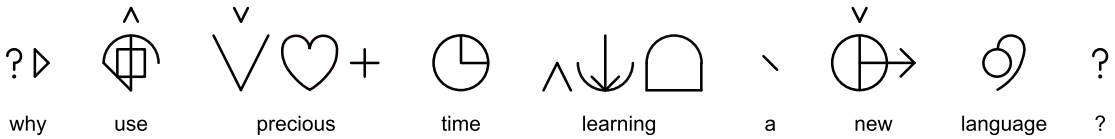
reading words using an alphabet is easy .



Blissymbolics may seem difficult to you .



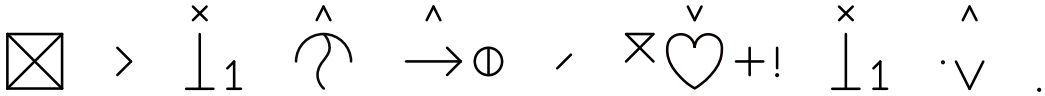
at the beginning , probably .



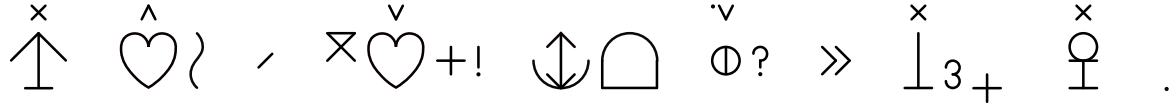
why use precious time learning a new language ?

self improvement ?

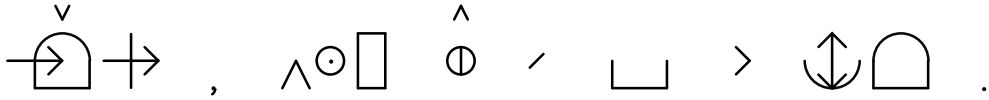
good reason (purpose) .



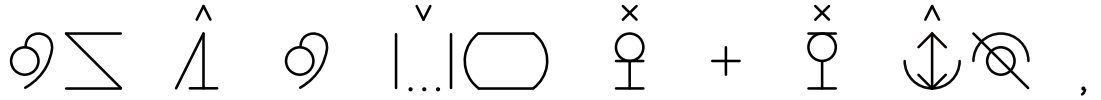
all of us wish to become the best we can .



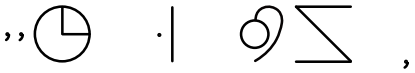
parents want the best education possible for their children .



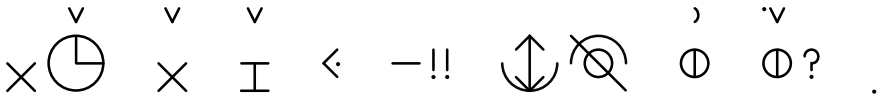
obviously , reading is the foundation of education .



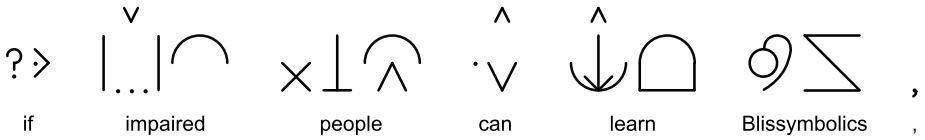
Blissymbolics helps language impaired children and adults communicate ,



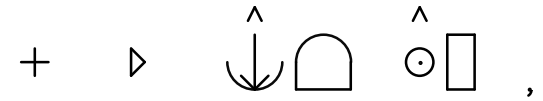
when before Blissymbolics ,



often very little or No communication was possible .

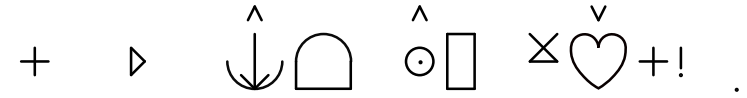


if impaired people can learn Blissymbolics ,

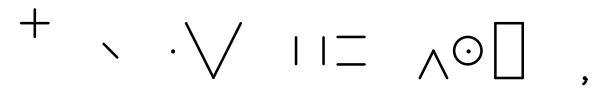


and therefore learn to read ,

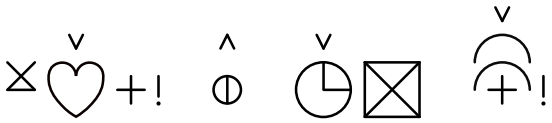
then everyone can learn Blissymbolics ,



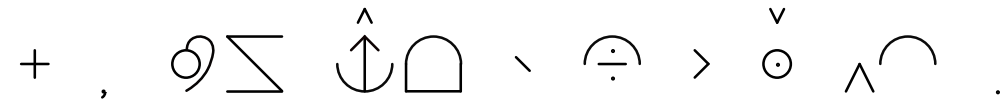
and therefore learn to read better .



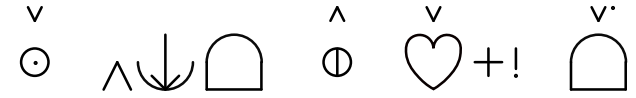
with a skill like reading ,



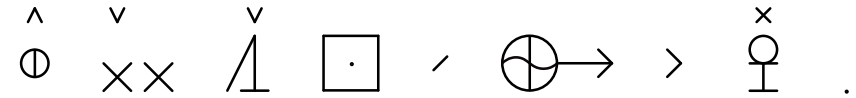
better is always good .



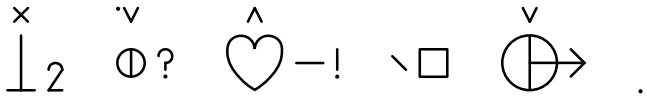
plus , Blissymbolics teaches a kind of visual thinking .



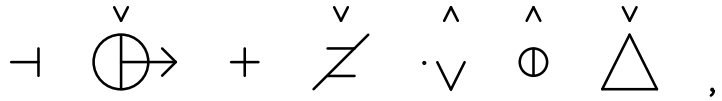
visual learning is well known



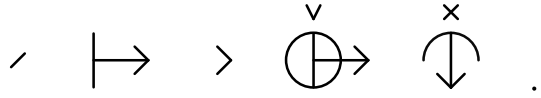
to be very very helpful in the development of children .



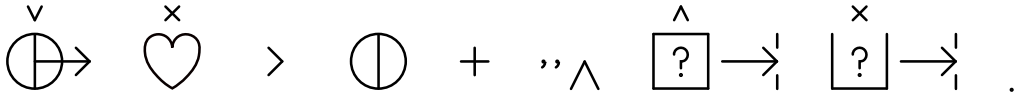
you may dislike anything new .



but new and different can be creative ,



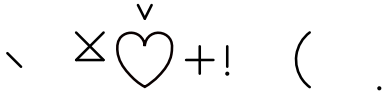
the beginning of new thoughts .



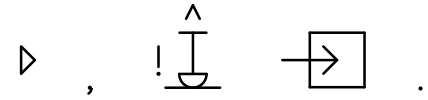
new feelings about life and how to solve problems .

more visual reading and thinking during early education

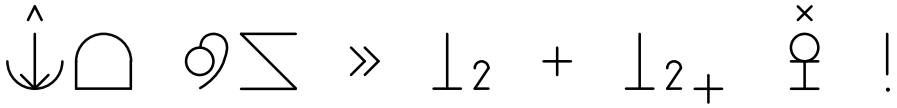
can produce architects , designers , planners , the future .



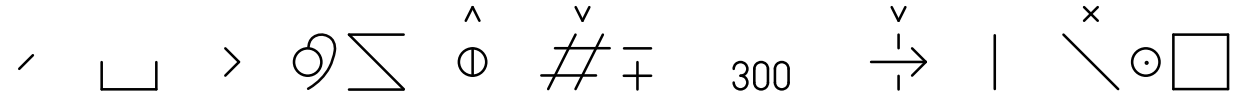
a better future .



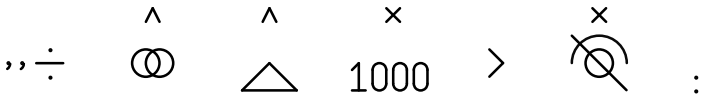
so , dig in .



learn Blissymbolics for yourself and your children !

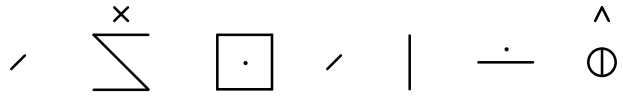


the foundation of Blissymbolics is approximately three hundred simple line drawings

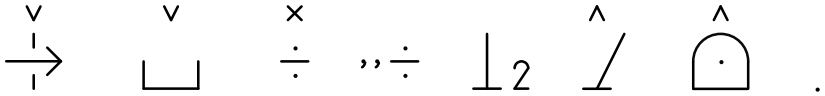


which combine to make thousands of meanings :

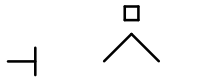
tree bush sun eye mouth house (or building) man woman roof



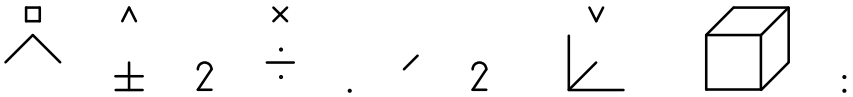
the blissymbols in the line above are



simple fundamental parts which you need memorize . .



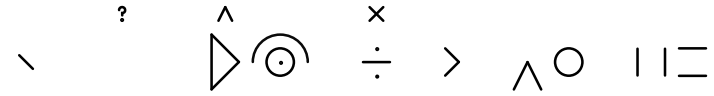
except roof . .



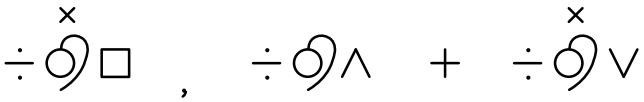
roof has 2 parts . . the 2 dimensional box :

square symbol above the roof symbol

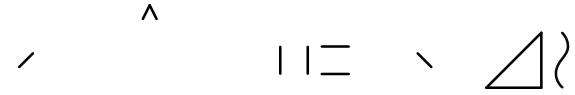
is called an indicator . .



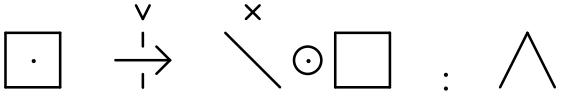
an indicator shows parts of speech like



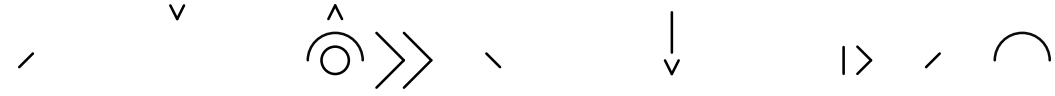
nouns , verbs and adjectives



the verb indicator resembles a volcano



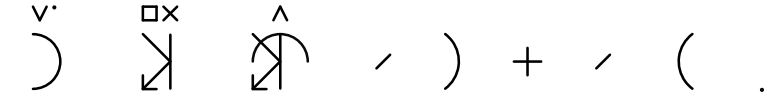
in simple drawings : action



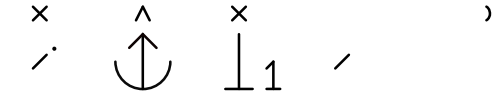
the adjective indicator suggests an arrowhead pointing down from the mind

because adjectives are not things or actions in the physical world .

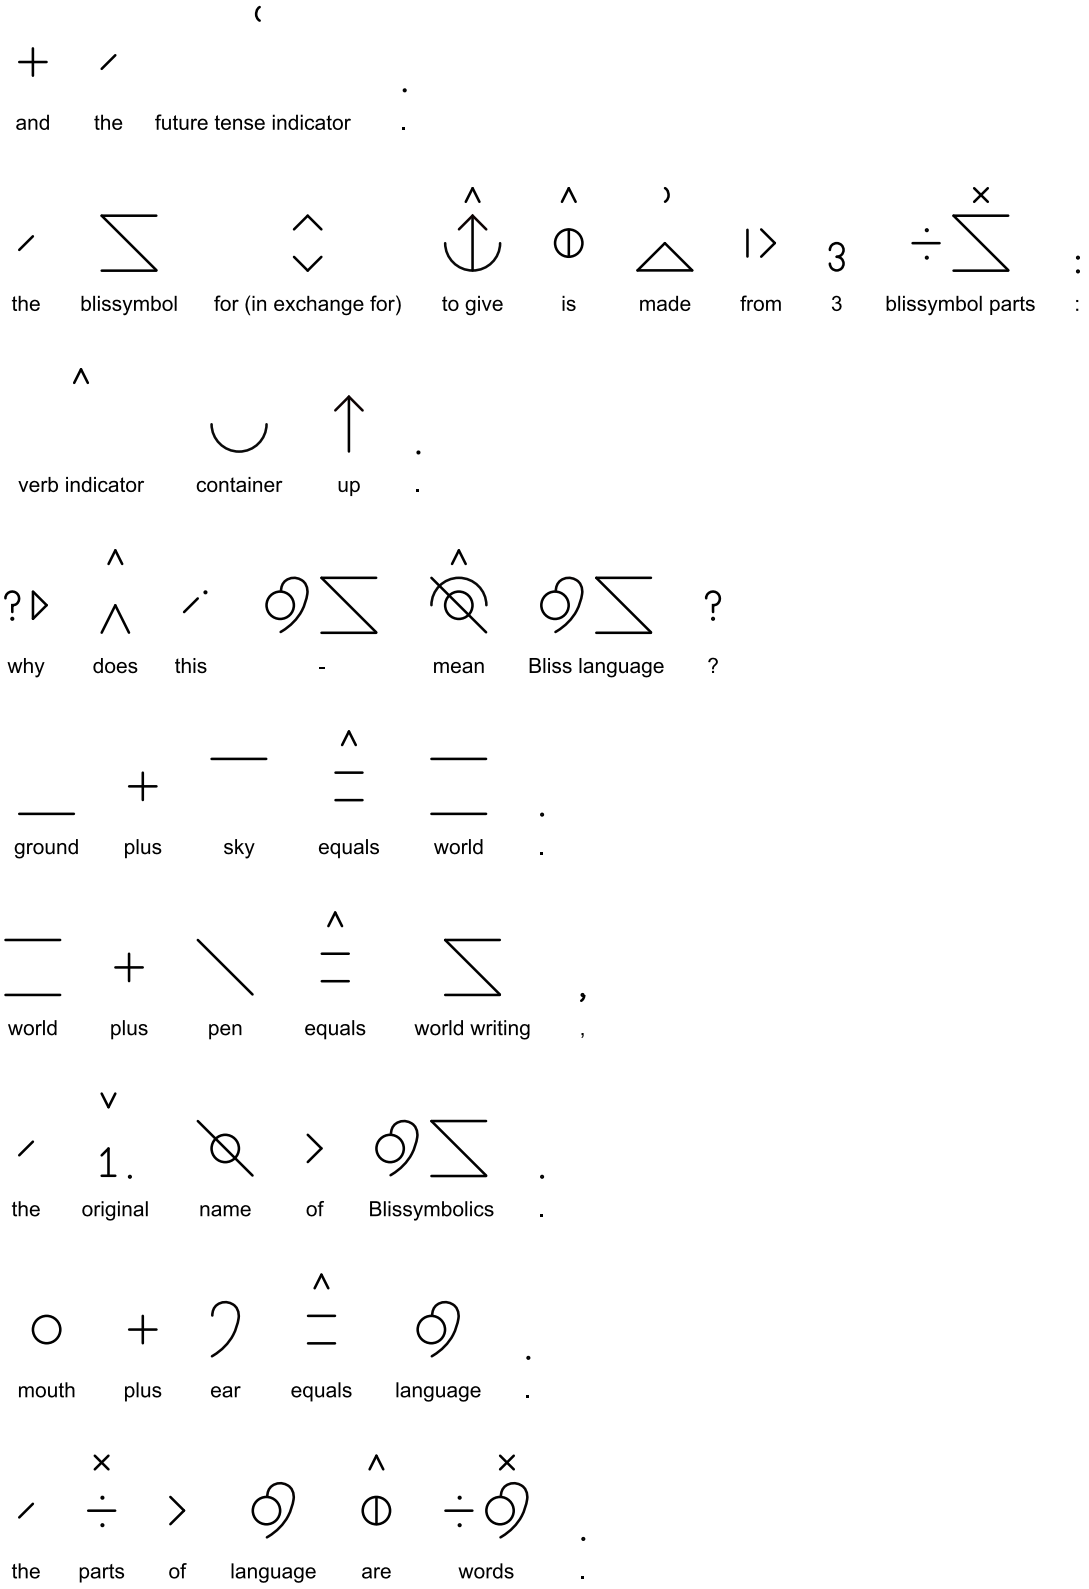
the blissymbols for (in exchange for) past and future represent



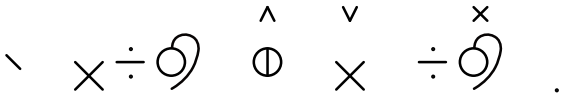
curved mirrors reflecting the past and the future .



these give us the past tense indicator

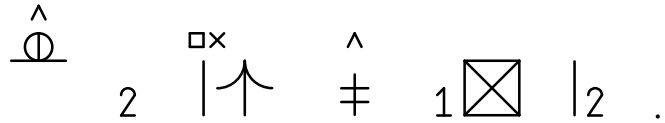


and the future tense indicator .
the blissymbol for (in exchange for) to give is made from 3 blissymbol parts :
verb indicator container up .
why does this - mean Bliss language ?
ground plus sky equals world .
world plus pen equals world writing ,
the original name of Blissymbolics .
mouth plus ear equals language .
the parts of language are words .



a sentence is many words .

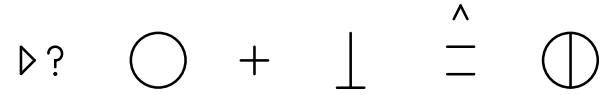
I guess you now learned the plural indicator ?



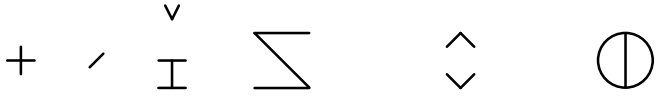
imagine 2 sticks crossing each other .

that is the blissymbol for (in exchange for) many of something .

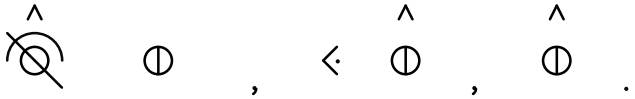
why does this - mean is ?



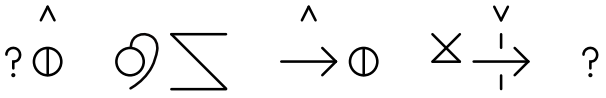
because sun plus person equals life



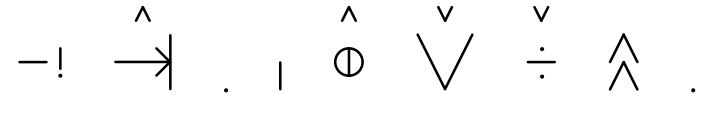
and the small blissymbol for (in exchange for) life



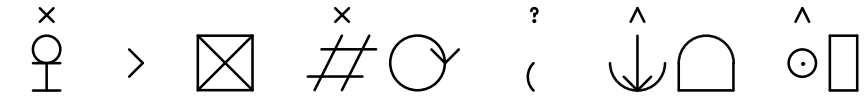
means existence , or to be , is .



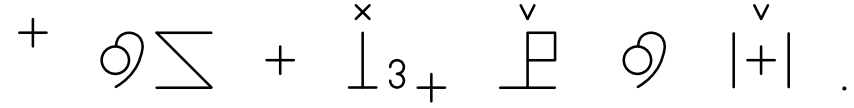
?is Blissymbolics becoming easier ?



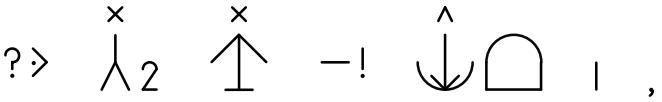
don't stop . it is worth some work .



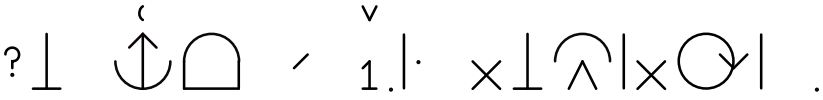
children of all ages should learn to read



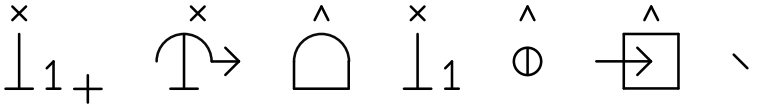
with Blissymbolics and their national language together .



if you parents don't learn it ,

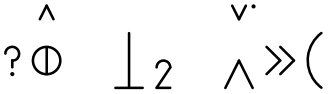


who will teach the next generation .

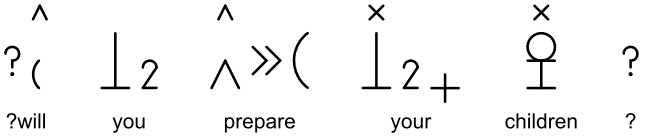


our leaders know we are entering a

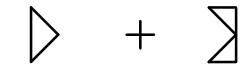
visual communication age .



?are you ready ?

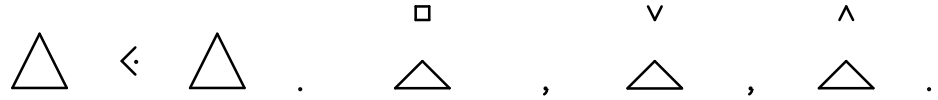


?will you prepare your children ?



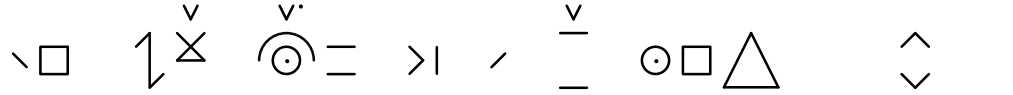
cause and effect

you can see they are shaped so one pushes into the other .

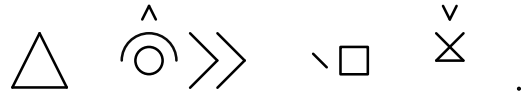


creation or nature . man made item , man made , to make .

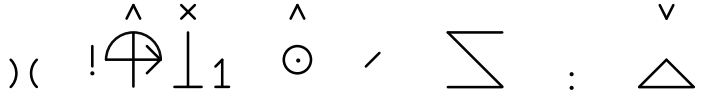
the short triangle for (in exchange for) man made suggests



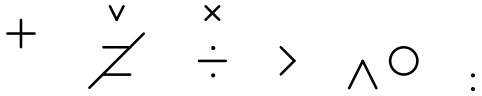
something less compared to the tall triangle for (in exchange for)



creation suggesting something more .

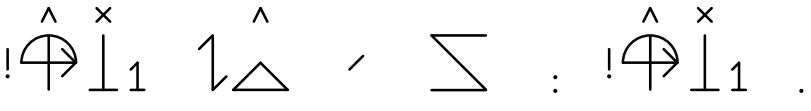


now let's see the blissymbol : man made



with different parts of speech :

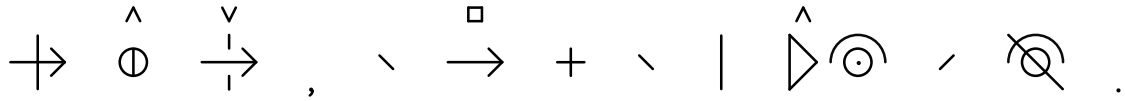
artifact to make made will make have made man made .



let's disassemble the blissymbol : let's .

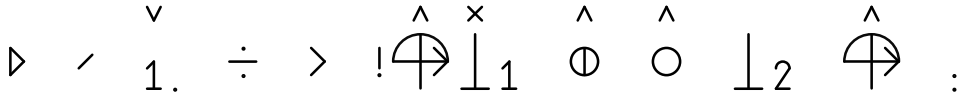
exclamation mark means more attention and when placed before

a verb it is telling you to do that act .



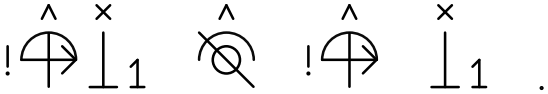
through is simple , an arrow and a line shows the meaning .

through the mind means allowance .



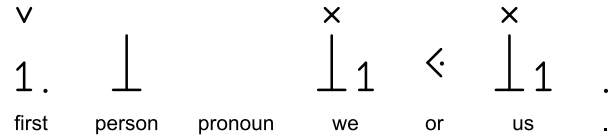
so the first part of let's (let us) is telling you to allow :

! allow .

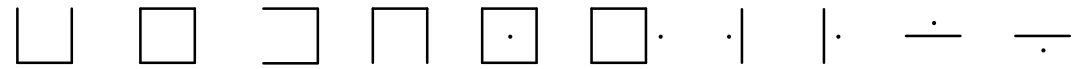


let's means ! allow us .

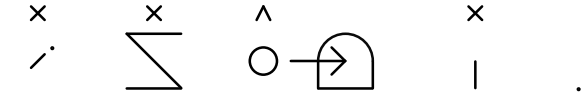
many of person and a 1 means



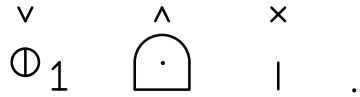
first person pronoun we or us .



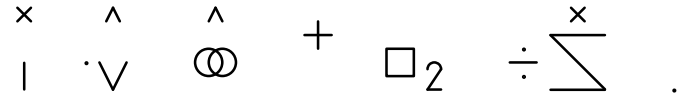
opening enclosure room door inside outside before after above below



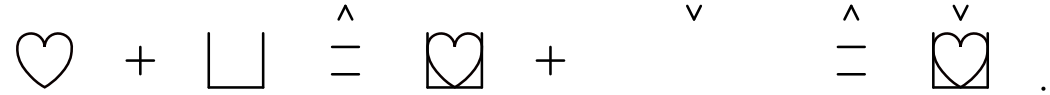
these blissymbols explain themselves .



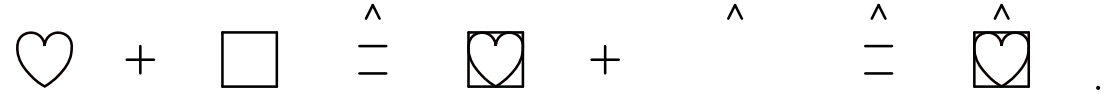
just memorize them .



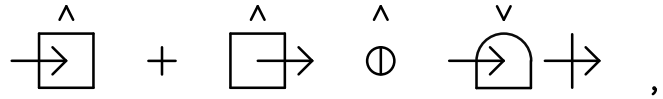
they can combine with other blissymbol parts .



feeling plus opening equals freedom plus adjective indicator equals free .

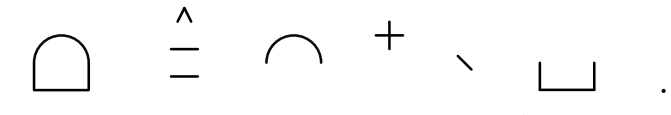


feeling plus enclosure equals oppression plus verb indicator equals to oppress .

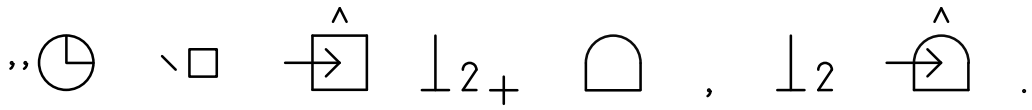


enter and exit are obvious ,

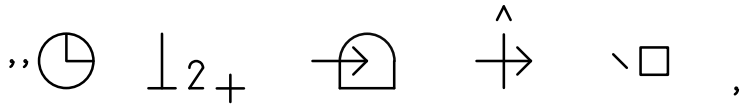
but obvious is not . humorous ? maybe .



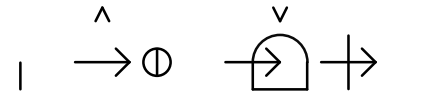
knowledge equals mind with a foundation .



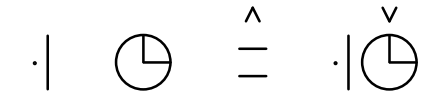
when something enters your knowledge , you understand .



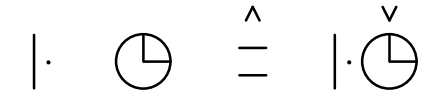
when your understanding penetrates something ,



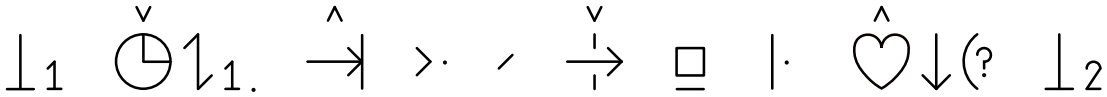
it becomes obvious .



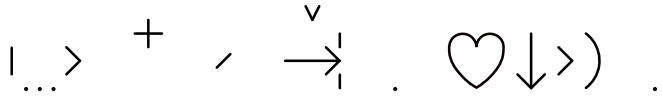
before time equals early .



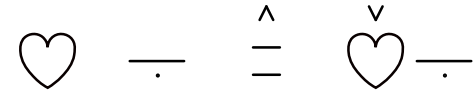
after time equals late .



I finally arrive at the easy stuff after scaring you

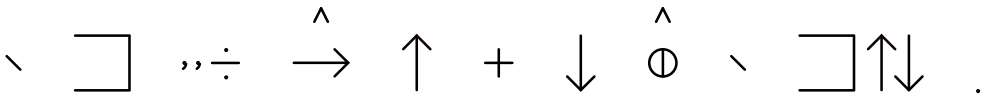


away with the hard . Sorry .

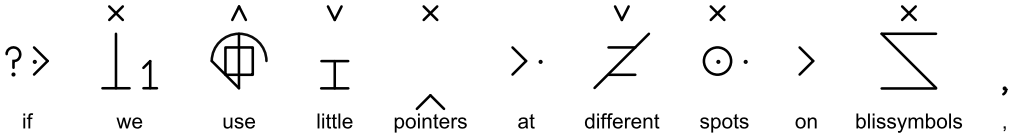


feeling below equals humble .

feeling
above
equals
proud
.

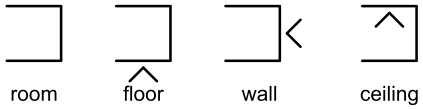


a
room
that
goes
up
and
down
is
an
elevator
.



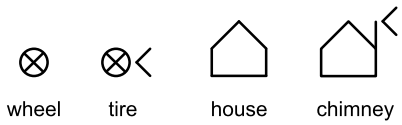
if
we
use
little
pointers
at
different
spots
on
blissymbols
,

we
can
express
more
specific
meanings
:

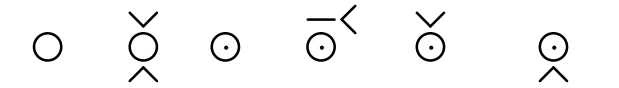


room
floor
wall
ceiling

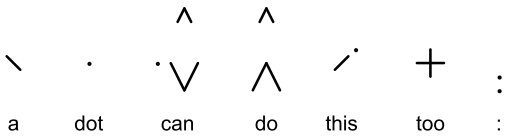
enclosure
top
middle
bottom
side



wheel
tire
house
chimney

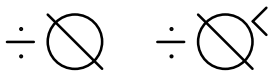


mouth
lip(s)
eye
eyebrow
eyelid
eyelid (lower)



a
dot
can
do
this
too
:

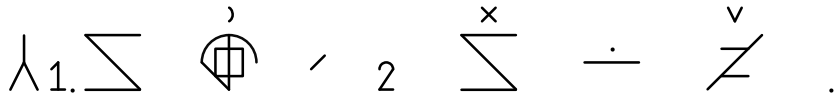
teeth tooth cavity face pimple



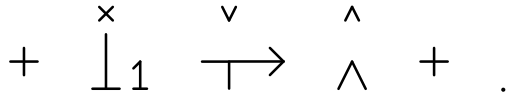
continent Africa

sun earth Earth axis North Pole South Pole north south east west

greater than (relation) less than (relation)

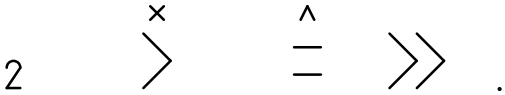


Charles K Bliss used the 2 blissymbols above differently .

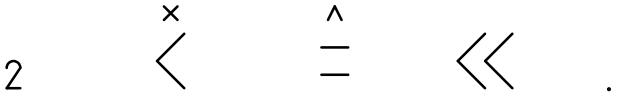


and we still do too .

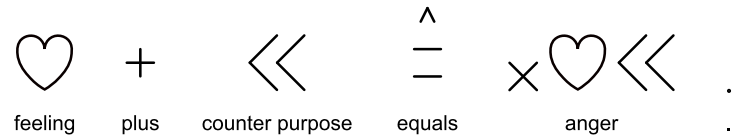
forward relation backward relation



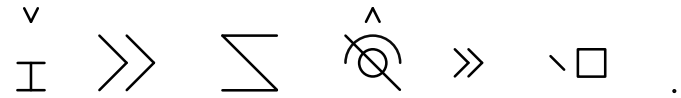
2 forward relations equals purpose .



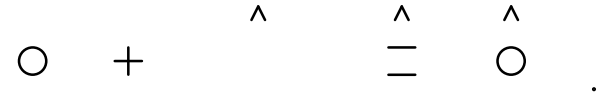
2 backward relations equals counter purpose .



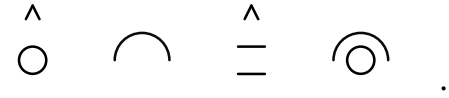
feeling plus counter purpose equals anger .



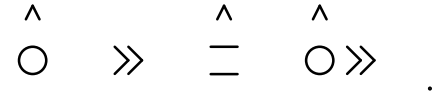
small purpose blissymbol means for something .



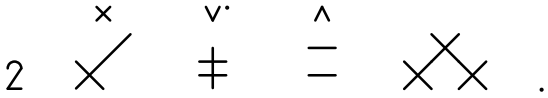
mouth plus verb indicator equals to speak .



to speak mind equals opinion .

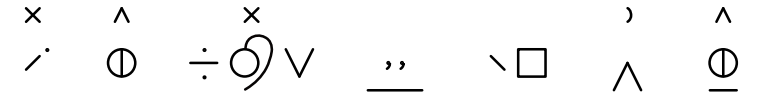


to speak for equals to support .

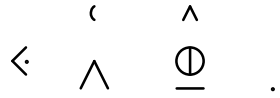


2 swords crossed equals war .

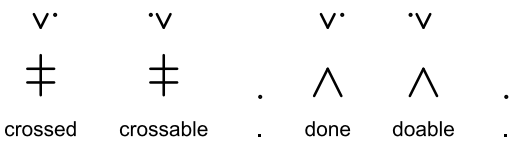
evaluation after indicator evaluation before indicator



these are adjectives where something did happen



or will happen .



crossed
crossable
.
done
doable
.
